About This Game

Just when you thought it was safe to eat chicken again, the chickens have returned with an organized invasion to take over the entire solar system! Journey to each planet and fight your way through to save the world (again)!

In the first chapter of the Chicken Invaders saga, you defended Earth against an invasion of intergalactic chickens seeking revenge for the oppression of their earthly brethren. However, as you were clearing out the last of the chicken invaders and were looking forward to a double chicken burger special at the space burger bar, the true scale of the problem became apparent: the first invasion was simply a precursor to the chicken's main assault! Their master plan now becomes clear: to invade each planet in the solar system and make sure that it is inhabited exclusively by chickens!

The time has now come to don your egg-repulsing helmet and make the biggest omelette you've ever made as you continue your adventure in the second chapter of Chicken Invaders: The Next Wave. Only you can make a difference. Will you succeed? Will the future of chicken burgers be secure? Or will you end up as part of the menu in a galactic chicken restaurant?

Bejeweled for losers.

(It's me I'm the loser because I bought this game). Nice Game but I recommend you to wait for a sale because I think the normal price is too high. Im enjoying this game so far. Its not battle royale necessarily, similar but not quite. 16 ppl split up into teams of no more then 4 all trying to get their hands on the 4 cases so they can escape the island. Easy to get a case but others get ahold of them and then you have to hunt those ppl down for their cases as they do aswell for you. Loot like pubg running around finding armor, backpack, guns, attachments, and ammo aswell as parts to fix the numerous Tanks, APCs, jeeps, trucks, helis, and planes scattered around the map.

Its pretty basic atm but with some time and support from the community this could become a gem.. Parrots, also known as psittacines $\text{\u02c8s\u026a\u0259sa\u026anz}$, are birds of the roughly 393 species in 92 genera that make up the order Psittaciformes, found in most tropical and subtropical regions. The order is subdivided into three superfamilies: the Psittacoidea ("true" parrots), the Cacatuoidea (cockatoos), and the Strigopoidea (New Zealand parrots). Parrots have a generally pantropical distribution with several species inhabiting temperate regions in the Southern Hemisphere, as well. The greatest diversity of parrots is in South America and Australasia.

Characteristic features of parrots include a strong, curved bill, an upright stance, strong legs, and clawed zygodactyl feet. Many parrots are vividly coloured, and some are multi-coloured. Most parrots exhibit little or no sexual dimorphism in the visual spectrum. They form the most variably sized bird order in terms of length. The most important components of most parrots' diets are seeds, nuts, fruit, buds, and other plant material. A few species sometimes eat animals and carrion, while the lories and lorikeets are specialised for feeding on floral nectar and soft fruits. Almost all parrots nest in tree hollows (or nest boxes in captivity), and lay white eggs from which hatch altricial (helpless) young.

Parrots, along with ravens, crows, jays, and magpies, are among the most intelligent birds, and the ability of some species to imitate human voices enhances their popularity as pets. Trapping wild parrots for the pet trade, as well as hunting, habitat loss, and competition from invasive species, has diminished wild populations, with parrots being subjected to more exploitation than any other group of birds. Measures taken to conserve the habitats of some high-profile charismatic species have also protected many of the less charismatic species living in the same ecosystems.. The puzzles are hard...at first.. Guessing this is the result of a game dev that got high because everyone forgot his/her birthday.. A decent game. Not great, almost good, but not quite.

The game has been significantly improved from EA, things seem to work better and there are not longer any place holder graphics(from what I can see atleast).

I would say its worth maybe \$3-5 not \$10.

I would try to get it for \$1-2. (I got it from a bundle)
I'm going to be nice and recommend it, as its kind of fun.

Negatives:

The game feels pointless.

All you do is explore but in my last playthrough I explored 100% of the galaxy and couldn't find anything else to do, so I just wandered around till time was up.

Everything is random, with no good point or story.

There is very little challenge.

The the 3d map is annoying rather than a nice feature.

A lot of stuff is unexplained and unintuitive.

Personally I liked the last one better.

. This overlooked Treasure game is one of my favorite Genesis games. It features an interesting magic system, as well as plenty of challenging puzzles.. As long as the developer keeps working on it, it's a WIP (Work In Progress) and should be viewed as such.

There is a reasonable number of kanji and all kana with the exception of the less common wi and we kana available for tests.

Charts to study for tests are available for kana only; these charts also do not display wi or we kana.

As of this review, there are no kanji charts though it has been posted as an upcoming feature.

Kana tests allow duplicate visuals, which I hope becomes an option in the future.

As of this review, there is no phrases, tenses, grammar, or dictionary. For a touchscreen laptop about the size of a 10" tablet, this could be ideal for the 1st month of the 1st semester of a college Japanese class because of the kana charts in combination with the kana tests. As the kanji charts are not there, I don't see it being useful for studying kanji from an efficiency standpoint.

If you have a summer of time to burn, and you really want to know Japanese, I recommend "Modern Japanese: A Basic Reader" Volume 1 and Volume 2 (Hibbet, Itasaka. Harvard University Press). It's old and it's hard, but it's got all the kana and over 2000 kanji and a lot of reading in one course... assuming you survive, you could feel like you graduated a low end Japanese high school. Seriously though, don't even think you can do that course in a month. Get a ream of printer paper, a pack of pens, and copy the 60 chapters of vocabulary in Volume 1. Then study what you copied. Then copy the reading from Volume 2 and use the vocabulary you copied from Volume 1 as pieces to a puzzle until the puzzle is solved. Repeat 60 times since there are 60 chapters. Find three months and hit it hard. Very hard.. I consider Alien Zombie Megadeath, the other game from developer PomPom, one of the best arcade games of the latest years. Unfortunately I cannot say the same for Astro Tripper. Presentation aside (it's even more basic than AZM) the game is basically a defender inspired shooter but it's extremely difficult and frustrating. There are three difficulty levels, easy, hard and extremely hard. I've played at hard difficulty (never played a game in easy mode in my life) and I haven't been able to finish the first training level after a dozen game overs. Enemies spawn everywhere, they shoot a lot, some of them collide with each other suddenly changing trajectory, the play area is extremely narrow and, just to add some frustration, you can fall over the play area so you must be extremely careful while maneuvering your ship. Being a defender clone you also have to press a button to flip the ship direction, easier said than done given the overall difficulty. In the end it's not a bad game, it's just badly calibrated and for this reason I could only recommend it to hardcore space shooter lovers. Go play Alien Zombie Megadeath instead.

Really nice game. For those who love to listen to musik and get brain♥♥♥♥♥ed by light effects, this is ur game!
Keep on going nice game!. Very confusing, no clear tutorial or help, and no clear plot line of how to do things.... pretty simple game were you have to plan the landing of helicopters and planes.
the music can be annoying, the rest of the game forces me to play more to beat my own highscore.
im sure it can be addicting, also very complicated after a few minutes and i noticed that my coordination abilities could be better.

i would say buy it for playing in breaks or in some sparetime, its good.. It remains a concept rather than a finished product and I don't regret having quenched my curiosity but the question is : Do you recommend this game? The answer is an honest "no". It lacks substance, objectives, there is very limited exploration and an overly confined world even if the weather concept is interesting (albeit not extremely new). I found a way to jump across the fence behind the backyard into the "Void" and I thought to myself that there might be something more to this game than I originally thought! I will probably fall into a fantastic alternate world beyond The Void, maybe another part of the Earth with a different weather, maybe even another planet with its corresponding atmosphere! But no, it's just a bug where if you jump across the fence into the The Void, you don't respawn or anything. The screen just stays white. Thought the devs should know.. I am usually a bit dubious when it comes to green lit titles on Steam, the lack of quality assurance meant what I get can be a mixed bag, this game is the prime example of why the system might need reviewing.

First of all the game only has three stages, with the total length around thirty minutes including retries. There is no plot, save point, option or a pause button to be found; you get hit once and the game restarts. The enemies don't shoot at all and they are railroaded to move in straight lines only, this applies to the bosses as well though they bounce around the screen a bit.

The graphics are almost non-existent, comparing this to flash games might be an affront to the flash format. The music was interesting for the first impression, until you find out there are only two tracks that loops every dozen seconds or so. The ending was mildly surprising, but I can only attribute that as sloppy excuses to cut development time.

It doesn't matter how cheap this is, you wouldn't want to spend money on this, period.
