The subject matter herein relates generally to connector systems for electrical modules. Radio frequency (RF) modules such as power transistors, switches, mixers and the like are known to be mounted onto circuit boards. Each module includes a number of electrical contacts that mate with corresponding electrical contacts of the circuit board. The electrical contacts of the module and the electrical contacts of the circuit board are secured together via soldering. For example, solder is applied to the contacts on the electrical module and then the electrical module is placed in contact with the contacts on the circuit board. The solder contacts are heated until the solder melts and the contacts come in contact with each other. The electrical module is then cooled. Once cooled, the solder is re-solidified and the contacts make a permanent electrical connection there between. A problem with the known electrical modules is that as the electrical module is placed on the circuit board, the electrical contacts experience non-uniform forces (e.g., forces that are not perpendicular to a plane of the circuit board or contact). These forces result in deformation of the electrical contacts. The deformation may cause a loss of electrical contact and/or a premature failure of the electrical connection. Additionally, the connectors do not typically withstand high operating temperatures of the circuit board. The connectors are subject to significant thermal expansion. The thermal expansion may cause excessive movement between the contacts, causing the electrical connection to fail. A need remains to improve upon electrical modules and electrical module connector systems. 1.1 0.4 0.1 1.1

Any idea if it is a bug or it was disabled after the update or is it my fault? Any idea how to fix it? A: How I found the solution: I deleted everything in %appdata%\Microsoft\keynav,

%appdata%\Microsoft\keynavclient, %appdata%\Microsoft\keynav\X-Hudson* and readded the shortcuts from the original windows 8. Important note: if you are having an existing shortcut made to keynav, you have to copy paste the shortcut into %appdata%\Microsoft\keynavclient and/or
